Top 10 Cities by Final Sales

KEY INSIGHTS

- **Highest Revenue City:** Bengaluru generated the highest final sales among the top 10 cities, making it the strongest-performing city in terms of revenue.
- **Revenue Distribution:** Sales across most top cities are relatively close, indicating that revenue is not highly dependent on only one geographic market.
- **Strong Performing Cities:** Pune and Ahmedabad also recorded high final sales, showing strong customer demand in these locations.
- **Business Opportunity:** High-performing cities can be prioritized for marketing campaigns, inventory availability, and customer retention strategies.

SLIDE 03

Final Sales by Product Category

KEY INSIGHTS

- Highest Revenue Category:** Grocery generated the highest final sales among all product categories, indicating strong revenue contribution.
- Lower Revenue Category:** Sports recorded comparatively lower final sales, suggesting relatively lower revenue contribution than other categories.
- Strong Categories:** Furniture and Books also performed strongly and contributed significantly to overall sales.
- Business Focus:** High-performing categories can receive greater inventory and promotional focus, while lower-performing categories can be analyzed for growth opportunities.

SLIDE 04

Revenue Contribution by Sales Channel

KEY INSIGHTS

- **Leading Channels:** Website and Mobile App each contributed approximately 38% of total revenue, making them the dominant sales channels.
- **Lower Contribution:** Offline contributed around 10%, while Marketplace contributed approximately 14%, considerably below the major digital channels.
- **Digital Dominance:** Together, Website and Mobile App account for roughly 76% of revenue, showing strong customer preference for digital purchasing.
- **Business Opportunity:** The company can continue strengthening Website and Mobile App performance while investigating opportunities to improve Marketplace and Offline sales.

SLIDE 05

Revenue by Customer Segment

KEY INSIGHTS

- **Highest Revenue Segment:** Regular customers generated the highest revenue, making them the most valuable customer segment in overall sales contribution.
- **Premium Segment:** Premium customers contributed moderate revenue but remained below Regular and New customer segments.
- **Strong New Customers:** New customers were the second-largest revenue contributor, indicating healthy customer acquisition.
- **At-Risk Customers:** At-Risk customers generated the lowest revenue, highlighting an opportunity for targeted retention campaigns and personalized offers.

SLIDE 06

Preferred Payment Methods

KEY INSIGHTS

- Most Preferred Method:** Debit Card was the most frequently used payment method, accounting for approximately 19% of orders.
- Payment Diversity:** No single payment method dominates customer transactions, indicating diverse payment preferences among customers.
- Balanced Preferences:** COD represented around 17%, while Credit Card, UPI, Wallet, and Net Banking each contributed roughly 16%.
- Customer Convenience:** Supporting multiple payment options remains important because customers are distributed evenly across different payment methods.

SLIDE 07

Average Discount (%) by Product Category

KEY INSIGHTS

- Highest Average Discount:** Sports received the highest average discount at approximately 12.7%, slightly above all other categories.
- Lowest Average Discount:** Grocery and Beauty received comparatively lower average discounts than the other categories.
- Consistent Discount Strategy:** Most categories received average discounts within a narrow range of roughly 12.3%–12.7%.
- Business Insight:** The small variation between categories suggests a relatively consistent discount strategy rather than aggressive category-specific discounting.

SLIDE 08

Quarter-wise Final Sales

KEY INSIGHTS

- Highest Sales Quarter:** 2023-Q1 recorded the highest final sales at approximately 6.8 million, making it the strongest quarter in the analyzed period.
- Strong Recent Performance:** 2025-Q1 was another strong quarter, reaching approximately 6 million in final sales.
- Sales Fluctuation:** Quarterly revenue fluctuated mostly between approximately 4.9 million and 6.1 million, indicating moderate changes in sales performance over time.
- Trend Opportunity:** Changes between quarters should be compared with promotions, seasonal demand, and customer activity to identify factors driving peak and weaker periods.

SLIDE 09

Return Status by Product Category

KEY INSIGHTS

- **Majority Orders Retained:** Not Returned orders significantly exceeded Returned orders across every product category, indicating that most purchases were successfully retained.
- **Category Comparison:** Return volumes appear relatively consistent compared with the much larger number of successfully retained orders.
- **Highest Return Volume:** Furniture showed the highest absolute number of returned orders, although it also had the highest overall order volume.
- **Business Action:** Instead of looking only at return counts, calculating Return Rate (%) by category would better identify categories with actual return-performance problems.

SLIDE 10

Total Quantity Sold by Product Category

💡 KEY INSIGHTS

- **Highest Quantity Sold:** Furniture recorded the highest quantity sold at approximately 14,260 units, indicating the strongest product demand by volume.
- **Lowest Quantity Sold:** Books recorded the lowest quantity among the categories at approximately 11,548 units, although the difference from several other categories is not very large.
- **Strong Demand Categories:** Home & Kitchen and Grocery also recorded high sales volumes, with approximately 12,479 and 12,142 units respectively.
- **Inventory Planning:** Higher-demand categories such as Furniture should receive greater inventory attention, while demand patterns can help optimize stock allocation and reduce stock-out risk.
